For years Kusch+Co has been developing and manufacturing seating designed for the most demanding business sectors. Our products have been offering a healthy comfort, excellent aesthetics, and perfect functionality in hospitals, airports, residential care and nursing facilities. All of these much-frequented spaces are subject to stringent preventive building measures and need to be furnished with technically advanced series that provide efficient and practical solutions targeted at specific problems.

As the world has undergone major changes over the last years and we always wish to do better and voluntarily raise the bar, we want to transpose the solutions created originally for the highly demanding sectors to the office environments. The result is V-Care, an exceptional, hygiene-safe chair that outperforms the requirements of the normative standards.

REDD

Design Award 2022

The Red Dot Design Award 2022 for the sled-base model says it all about the exceptional design quality of the V-Care series. In the hands of interior designers, this chair is a highly effective design tool for creating spaces. In all those places where people expect enhanced sitting opportunities every day.

OOT

“The starting point and central element of V-Care is the shell. It should not only be comfortable and look comfortable but also create a positive and friendly atmosphere. The shell looks like it was formed by nature. It has something exhilarating and, despite its material strength, has something fine and light.” – Justus Kolberg

The chair's
bevelled
edges reflect
the light,
accentuating
its slender
shape.

A solution for much-frequented office environments

16

With its hygienic properties, V-Care is a perfect solution for much-frequented office environments like canteens, lobbys and waiting areas.

Functional stackable design

Stackable up to 5 pieces.

WE CARE ABOUT YOU

UR COMFORT

Enhanced seating comfort

V-Care is made of polyurethane which absorbs body temperature, boosting the seating comfort. Additionally, the unique structure of the surface prevents from slipping down from the seat.

KUSCH+CO

The slightly curved, ergonomically pronounced seat shell seems to wrap itself around the body of its occupant, while the fabric-like structure of the surface adds a haptically soft touch to the seating experience.

KUSCH+CO

A close-up photograph of a dark, curved seat shell, likely from a car or a high-end chair. The shell is ergonomically shaped, curving around the occupant's body. The surface has a subtle fabric-like texture. A light-colored horizontal stripe is visible on the lower part of the shell. The background is dark and out of focus.

WE CARE ABOUT YOU

UR SAFETY

dentist

[den(t)ist] • noun

Someone who knows the drill, gets to the root of the problem and always seeks the tooth.

DENTIST

Hygiene-safety

V-Care was born with hygiene DNA.

The chair has a unique anti-bacterial PU surface with silver ions, which reduces the growth of bacteria. It is not only easy to clean, but also safe to disinfect.

Its surface is resistant to a variety of cleaning and disinfecting substances. Will not be damaged or discoloured. Particularly now, following the pandemic-dominated years, this is not only immensely important in terms of functionality, but psychologically speaking, also accommodates people's heightened hygiene awareness.

Particularly high hygiene safety requirements apply in hospitals, doctors' surgeries, retirement and nursing homes. The V-Care excels in meeting these requirements.

kuschmed[®]
HYGIENIC-LINE

V-Care chair on 4 metal legs with or without armrests meets the demands of kuschmed[®] Hygienic-Line.

Inclusive design

Designed for people with reduced mobility, the model is available as a four-leg version with a seat height of 46, 51, or 56 cm.

Another safety bonus is provided by the chair legs, which do not protrude past the edge of the seat, which could cause somebody to trip. You will also appreciate a load-bearing capacity of up to 150 kg body weight.

Reinforced armrests even enable the chair to be lifted and moved while somebody's sitting in it. The cut-out in the backrest makes it easier to grasp and move the chair, and the inclination of the backrest helps the occupant to stand up.

The reinforced armrests

Perfectly suited for travel environments

Worldwide, more than 260 international airports have furnished their environments with our waiting benches, seat islands or lounge furniture. These products are specifically designed for the waiting areas in airports, tried-and-tested in cruise terminals as well as bus and railway stations.

V-Care is perfectly suited for the travel environments. Not only does it meet the high requirements regarding safety, functionality, design, comfort and utility. Thanks to the antibacterial surface – both easy to clean and allowing a safe disinfection - V-Care offers an improved hygienic safety. Add to this the Fire Prevention Concept as well as the solutions for persons with reduced mobility.

V-Care, a chair that informs any space - lounges and waiting areas at airports, cruise terminals, cafeterias or a wide range of public buildings.

Modern design with its minimalist contours on the one hand and commodious comfort with more than just a hint of cosiness on the other are usually implacable rivals. What initially seemed irreconcilable has now been actioned so remarkably in V-Care series.

C

„Quality is irreplaceable”

– Ernst Kusch

To us, quality is the concept that translates not only into our products, their design, materials and precision we proceed with, but also into our approach. It's our motivation that propels us to constantly explore customer's needs and address them through our solutions. As a man is in the centre of our interest, we don't want to offer him just the products – we want to give him the quality, that can truly improve his work, his everyday and the environment he lives in.
